Notice of the damage by fire at Takasaki Solar Power Plant B.

Enex Infrastructure Investment Corporation (hereinafter “EII”) hereby announces that at June 5<sup>th</sup> around 4:00 p.m., a fire occurred at a Takasaki Solar Power Plant B (located in Takasaki City, Gunma Prefecture, with a panel output of 53,679.10kW) owned by EII.

With the cooperation of the fire department and the police, the fire was extinguished without causing any human damage. However, to ensure safety, the entire power plant has been shut down since June 6<sup>th</sup>.

In addition, although there was no fire, considering that the adjacent Takasaki Solar Power Plant A also uses the same model number of power conditioners, the entire plant also has been shut down since June 6<sup>th</sup> to ensure safety.

Although O&M servicer and manufacturers are currently working to determine the cause, the specific cause is unknown at this time.

We will let you know once again if there is any progress in the situation.
