Concerning Power Conditioner Fire Accident at Takasaki Solar Power Plant B

At Takasaki Solar Power Plant B (located in Takasaki City, Gunma Prefecture; panel output: 53,679.10kW) owned by Enex Infrastructure Investment Corporation (hereinafter referred to as "the Investment Corporation"), a fire broke out from one power conditioner shortly after 2:00 p.m. on April 13. The fire was extinguished at around 4:30 p.m. through the firefighting efforts of the fire department; however, operations of the entire power plant have been suspended since the same day from the perspective of ensuring safety.

Additionally, operations of the entire Takasaki Solar Power Plant A, which uses the same model of power conditioner, have also been suspended since April 13 from the perspective of ensuring safety, although no fire has occurred there.

There were no human casualties from this fire, and the damage was limited to the one power conditioner where the fire occurred.

Currently, we are proceeding with the investigation of the cause of the accident, and the O&M contractor is urgently proceeding with preparations for safety inspections of the remaining 9 undamaged power conditioners at Takasaki Solar Power Plant B and Takasaki Solar Power Plant A. Once safety is confirmed, we plan to resume operations of the undamaged equipment sequentially.

We will provide further updates as progress is made on the restoration status.

End
