(Note 1) Forecast power generation (P50) refers to the power generation output calculated by the producer of technical reports or other experts, as a figure of an exceedance probability P (percentile) 50 (a numerical value deemed achievable with a 50% probability). (hereinafter, “forecast power generation (P50)”)

(Note 2) EII acquired a property in Nagasaki Kinkai on January 17, 2020. Accordingly, the number of properties increased to 6 and solar module output, forecast power generation, and actual power generation came to include the property.

## 2. Monthly Power Generation by Power Plant
